

1. PROPOSAL 1 — XICHAVO FURNITURE & DÉCOR

Organisation Overview

Organisation Name

Xichavo Furniture & Décor

Organisation Type

Small Business / Retail Furniture Store

History

Xichavo Furniture & Décor is a fictional South African furniture business established to provide affordable and stylish furniture to households. The business focuses on providing customers with a convenient way to browse furniture products and make enquiries before purchasing.

The organisation aims to serve customers looking for quality furniture for bedrooms, living rooms and other areas of the home. The business will use its website to establish a professional online presence and make its products accessible to a wider audience.

Mission

The mission of Xichavo Furniture & Décor is to provide customers with affordable, stylish and quality furniture while delivering a convenient and customer-focused shopping experience.

Vision

The vision is to become a trusted furniture brand in South Africa by providing quality products, professional service and convenient access to furniture through digital platforms.

Target Audience

The website will target:

- Individuals furnishing new homes.
- Families looking for affordable furniture.
- Young adults setting up their first homes.

- Customers looking for sofas, couches and bedroom furniture.
- Online users searching for furniture products.

2. Website Goals and Objectives

The primary objective is to create an informative, attractive and easy-to-use website that increases the organisation's online visibility and encourages customers to enquire about products. The website will showcase products using photographs, descriptions and prices.

Key performance indicators (KPIs) will include website visits, product-page views, enquiry submissions, customer engagement and mobile usability. These indicators will help determine whether the website is effectively supporting the organisation's business objectives.

3. Proposed Features and Functionality

The website will contain at least five pages: **Home, About Us, Products, Enquiry and Contact**. The homepage will contain a hero image, introduction, featured products and call-to-action buttons. The About page will provide the organisation's history, mission, vision and values. The Products page will display furniture categories and product information. The Enquiry page will contain a form for customers to request information about products, while the Contact page will provide contact details, operating hours and more than one business location.

4. Design and User Experience

The proposed colour palette will use **dark brown, cream, white and gold**, creating a modern and premium furniture aesthetic. Headings will use a strong sans-serif font such as Montserrat, while body text will use a highly readable font such as Open Sans. The layout will use clear navigation, product cards, consistent spacing and prominent call-to-action buttons. The website will be designed responsively for mobile phones, tablets and computers.

5. Technical Requirements, Timeline and Budget

The website will be developed using **HTML5, CSS3 and JavaScript**, with Visual Studio Code used as the development environment. Git and GitHub will be used for version control. The proposed development timeline is approximately 10–12 weeks, covering research, planning, HTML development, testing and documentation. An estimated initial budget of **R3,250–R9,600** will cover development, domain, hosting, assets and initial maintenance.

PROPOSAL 2 — HOPE COMMUNITY DEVELOPMENT CENTRE

Organisation Overview

Organisation Name

Hope Community Development Centre

Organisation Type

Non-Profit Organisation

History

Hope Community Development Centre is a fictional South African non-profit organisation established to support communities experiencing social and economic challenges.

The organisation provides community-based programmes focused on youth development, education, food support and community empowerment.

Mission

To empower individuals and families through community development programmes, education and practical support.

Vision

To create stronger communities where individuals have access to opportunities, support and resources needed to improve their quality of life.

Target Audience

The target audience includes:

- Community members
- Volunteers
- Potential sponsors
- Donors
- Youth
- Families
- Community partners

2. Website Goals and Objectives

The main goal is to increase awareness of the organisation and encourage people to participate in its programmes. The website will clearly explain the organisation's purpose and demonstrate the impact of its activities. It will also provide visitors with convenient ways to enquire about volunteering, sponsorship and community programmes.

KPIs will include website traffic, enquiry submissions, volunteer enquiries, sponsorship enquiries, programme-page views and user engagement. These measurements will help determine whether the website is successfully achieving the organisation's communication and community-engagement objectives.

3. Proposed Features and Functionality

The website will contain five main pages: **Home, About Us, Projects, Enquiry and Contact**. The homepage will introduce the organisation and highlight current programmes. The About page will provide the organisation's history, mission, vision and values. The Projects page will showcase education, food-support, youth-development and community-support programmes. The Enquiry page will allow visitors to enquire about volunteering, sponsorship, donations or other opportunities. The Contact page will include contact information, operating hours, a contact form and information for more than one location.

4. Design and User Experience

The proposed colour scheme will use **green, white and dark green**, representing growth, hope and community. The design will use clear typography, simple navigation, accessible colour contrast and large call-to-action buttons. Images will focus on community activities and programmes. The website will use responsive design so that visitors can access the information easily on smartphones, tablets and computers.

5. Technical Requirements, Timeline and Budget

The website will be developed using **HTML5, CSS3 and JavaScript**. Visual Studio Code will be used for development, while Git and GitHub will provide version control. Development will take approximately **10–12 weeks**, including research, proposal development, sitemap and wireframe creation, HTML development, testing and documentation. A realistic estimated initial budget is **R3,000–R8,000**, depending on hosting, domain and maintenance requirements.
